

BE IT! Episode 3: "Mice to Meet You"

We hope you've learned from Reese and Caily's animal encounters and built your own animal habitat. On this drawing board, you now have a chance to sketch, write, wonder, and connect their stories to your own thoughts, feelings, and experiences. Go big, have fun!

Dream it

Make it

Be it!

At Stax, the makerspace, Caily, Reese, and Jax discuss their rodent problem and are trying to find a safe, gentle way to drive the mice away. Why do you think mice are hanging out at the makerspace?

Sketch things that mice like and don't like!

Have you ever seen a mouse? How do you feel if you hear things that are too loud or see things that are too bright?

Dev screeches when he sees a mouse in Confetti! It's okay to react to things. Do you have any reactions like that?

Flip the page over, and draw your reactions!

Animals (including humans!) have all sorts of senses. What are some of the senses you use most? Jot them down, and circle your favorite sense.

How come you chose that one?

Tell your friend about your imaginary animal and its habitat! What are your favorite characteristics of your imaginary animal?

What are your favorite characteristics of yourself?
