

# BE IT! Episode 4: "Bot We're a Team!"

We hope you're inspired by the creativity that Reese and Caily bring to their robot design! On this drawing board, you now have a chance to sketch, write, wonder, and connect their stories to your own thoughts, feelings, and experiences. Go big, have fun!

Dream it

Make it

Be it!

Caily and Reese are stuck on what kind of robot to create for their competition. Thankfully, Professor Seymour helps inspire them with his experience and story. You have a chance to create your own paper and cardboard robot. What do you want it to do?

**Sketch your ideas. Hint: think of a problem that you deal with all the time.**

Caily and Reese and their friends create a robot that listens to different commands, then does different things. Thankfully, both things that the robot does are good for the world! Think of something that has both a good side and bad side.

**Jot it down, and talk with a friend about it.**

Robots can do so many things these days. Look around your house, your neighborhood, your school, anywhere!

**Find 10 (or more!) things that are actually robots.**

Professor Seymour has such great ideas and inspiration. When you're in need of a spark of creativity or imagination, is there something you do or someone you go to? If not, jot down some possibilities!

**Sometimes, these could even be things that help you feel calm.**
